PROFESSIONAL SUMMARY

Full stack developer and founder building blockchain-based products, games, marketplaces, and utility apps. Focused on Next.js, React, TypeScript, Tailwind CSS, Web3, product execution, and shipping clear digital experiences.

CORE SKILLS

- Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS
- Backend: Node.js, REST APIs, Supabase
- Blockchain: Web3, Solidity, Hardhat, NFT and staking product flows
- Cloud & DevOps: AWS, Docker, Linux, Git, GitHub, Vercel
- Product: UI/UX, Figma, Design Systems, Product Strategy
- Focus Areas: Marketplaces, blockchain games, launchpads, utility apps

EXPERIENCE

BITMINER

Founder & Full Stack Developer | May 2025 - Present | Remote

- Built and expanded BITMINER as a blockchain-based mining game product with full-stack ownership across gameplay, product flows, and web experience.
- Expanded the game across Ronin and Solana networks while growing the player base to 3,600+ users and the community to 5K+ members.
- Generated over $100K in net sales and revenue through the game ecosystem, digital assets, and blockchain-based product activity.

BLUESYNC LABS

Director | Dec 2022 - Present | India

- Leading a startup focused on building digital products and games for clients across different business needs and product stages.
- Directed delivery across strategy, design, and development while shaping product execution over the last 3 years.
- Built and shipped multiple client products with a focus on strong UX, reliable development, and execution speed.

Dino World Game

Founder & Developer | Aug 2022 - May 2023 | Remote

- Designed and developed a Dino-based game on the WAX blockchain with a clear gameplay loop and blockchain-based reward structure.
- Raised over $60K in net NFT sales and revenue across the game ecosystem.
- Expanded the game to around 1,800 users and grew the broader community to 8K+ total members.

SELECTED PROJECTS

Bitminer
  - Blockchain-based mining simulation game across BSC, Solana, and Ronin with token-based progression, mining strategy, and reward systems.

BITPAD
  - Decentralized NFT launchpad and marketplace built for launches, discovery, and marketplace activity inside one product surface.

RoninScan
  - Ronin-focused blockchain explorer designed for wallet activity, token movement, and network-level visibility.

Sypheria
  - Blockchain-based play-to-earn game where players collect, trade, mine, hunt, and battle with virtual Dinopets; includes 150+ Dino Eggs across 8 rarities.

bitminer-partner
  - Decentralized staking platform built for Ronke tokens with reward flows and ecosystem participation mechanics.

nodepay
  - Automation product with 110 stars and 39 forks, focused on multi-account handling, proxy support, and long-running workflows.
